

MCA graduate (Chancellor's Gold Medal) with 3+ years across software testing at Infosys, MERN full-stack development, and AI model evaluation at Outlier. Proficient in Java, Python, JavaScript, React, Selenium, SoapUI, and UFT — the exact technology stack Infosys trains on. Adept at simplifying complex technical concepts, designing structured assessments, delivering multi-layered feedback, and improving learning outcomes through iteration.

PROFESSIONAL EXPERIENCE

AI Trainer — Prompt & Code Evaluation

Oct 2024 – Present

[Outlier](#) · [Remote](#)

- Evaluated AI-generated code in Java, JavaScript, Python, HTML/CSS — testing for correctness, logic, security, readability, and performance. Mirrors the exact technical assessment a trainer does when grading code.
- Applied SFT, Instruction Tuning, Chain-of-Thought Reasoning, Preference Ranking, and multi-turn dialogue evaluation; conducted red-teaming and safety reviews for ethical alignment.
- Wrote detailed, justified, multi-layered feedback for every evaluation — improving LLM accuracy in programming, math, ethics, and general knowledge. Feedback quality directly parallels trainer assessment design.
- Debugged and rewrote optimized solutions across multiple languages using VS Code and Replit; consistently delivered structured improvement recommendations at scale.

Operations Executive — Software Testing & QA

Feb 2022 – Feb 2023

[Infosys](#) · [Chandigarh](#)

- Executed end-to-end functional, performance, and UX testing on enterprise applications; designed test plans, test cases, and traced defects in Jira under Agile/Scrum delivery.
- Performed API testing with SoapUI; applied Robotic Process Automation (RPA) to streamline repetitive test workflows; validated fixes pre-deployment with cross-functional teams.
- Delivered consistent defect tracking reports, test execution documentation, and quality sign-offs — building strong technical ownership and communication skills.

Operations Executive Trainee — Testing & Automation

Oct 2021 – Jan 2022

[Infosys](#) · [Mysore \(Global Education Centre\)](#)

- Completed Infosys' intensive Operations Executive program: Java, Hibernate, Selenium, UFT (Microfocus), Agile Testing — the precise curriculum this Technical Trainer role delivers.
- Cleared all periodic evaluations and capstone project with distinction; mastered QA fundamentals, automation frameworks, and collaborative software development workflows.

EDUCATION

Master of Computer Applications (MCA)

Amity University · Oct 2021 – Oct 2023

★ [Chancellor's Gold Medal](#)

Bachelor of Computer Applications (BCA)

IIMT University · Aug 2018 – Aug 2021

★ [Dr. Smt. Satya Prabha Gupta Golden Award](#)

CERTIFICATIONS

- Generative AI Certification
- DSA with Java — Certified
- ChatGPT Certification
- Google Cloud Associate Cloud Engineer
- Google Cloud Quests & Skills Badges

WHAT I BUILD & WHAT I KNOW

Full-Stack MERN Apps

Built complete applications with React frontend, Node/Express backend, MongoDB, JWT auth, REST APIs, and responsive UI.

Test Automation

Hands-on with Selenium, UFT, SoapUI, REST Assured, Appium; wrote test scripts, automated regression suites, integrated with Jira.

AI Code Evaluation

Reviewed 1000+ AI-generated code samples across Java, Python, JS — assessed logic trees, security flaws, and readability standards.

Prompt Engineering

Designed multi-turn prompts, chain-of-thought instructions, adversarial red-team prompts; studied LLM reasoning failure modes.

SKILLS & TECHNOLOGIES

Core Java   Spring Boot   Python   JavaScript   React.js   Node.js   Express.js   HTML5   CSS3   Bootstrap

MERN Stack   REST API   Microservices   MySQL   MongoDB   DSA (Java)   Git   Linux/Unix   DBMS

Selenium   UFT (Microfocus)   SoapUI   REST Assured   Jira   Agile/Scrum   RPA   Test Planning   ALM

Prompt Engineering   AI Model Evaluation   Chain-of-Thought   Red Teaming   SFT   RLHF   LLM Feedback

Google Cloud (GCP)   VS Code   Replit   Curriculum Design   Assessment Design   Virtual Training
